Description of course and content

This academic postgraduate course sets Homeopathy to scientific standards, brings clarity and coherence. Delivered in a thriving classroom environment, 3 days/month over 2 years, this highly structured course will equip you with an in-depth understanding and clear methodology to treat successfully and with confidence challenging cases and chronic conditions. You will access the latest medical breakthroughs and get a new understanding of health, pathology, and the dynamic process of cure, accurately prescribe remedies that have no side-effects but achieve a long-lasting cure and enhance your patients' emotional and mental well-being. You will boost your practice with successful alternative treatments where conventional medicine offers limited options.

Modules 1 & 2: Theory

Solid foundation and in-depth understanding of classical homeopathy principles and practice. All aspects are thoroughly investigated and widely discussed. Experiences are shared. Law of similars - Nature of the vital force - Action of the remedy - Provings - Homeopathic aggravation - Reactions after the remedy - Appearance of proving symptoms during treatment - Miasms - Prescribing strategies and methodology - Definition of health - How to measure and evaluate health - Progression of diseases - Direction of cure - The Continuum of Diseases...

Modules 3, 4, 5: Materia Medica

150+ remedies, keynotes, essence of remedy, and differential diagnosis. Accurate materia medica with clearly differentiated remedies.

Modules 6: Repertorisation, Q&A, various topics

Clear methodology for repertorisation, how to use the rubrics and the smart features of the VC repertorisation software. Discussions on key topics and controversies on Homeopathy. Potency and age - Choice of potency in skin eruptions - When to repeat a remedy - Aggravation in serious cases - Allopathic medicines during homeopathic treatment - Antidotes to remedies - Incurable diseases - Antidepressants - Personality disorders - Managing acute mental episodes...

Modules 7, 8, 9: Clinical cases

60+ cases with in-depth analysis, long follow-ups, prescribing strategies and differential diagnosis. Covers a large variety of conditions: chronic fatigue - multiple sclerosis - panic attacks - sudden loss of memory - delayed development - juvenile diabetes - pubertas praecox - epilepsy - enuresis - arthritis - depression - fibromyalgia - sciatica - vertigo - high blood pressure - chronic cough - Crohn's disease - migraines - suicidal disposition - ulcerative colitis - duodenal ulcer...

Modules 10: The Levels of Health

Master this breakthrough in medical science to assess the depth of a pathology, give a more accurate prognosis, anticipate the reactions, and elaborate a treatment plan. Theory exemplified with numerous cases.

An unrivalled postgraduate course with many benefits
